EXPERIENCE

Front-End Developer – Mobile Fringe

Toronto, Ontario

January 2021 – Present

- Developed over 20 responsive and mobile friendly websites for major shopping centres across North America with over 300,000 monthly visitors cumulative
- Responsible for providing live support and fixes for critical bugs and updates ensuring a 99.99% website uptime
- Develop websites following WCAG 2.0 (Level AA) guidelines using Monsido, axe and Lighthouse
- Develop re-usable web templates that help to save over 25 hours of developer time for every new website build
- Provide code review and guidance to junior developers ensuring design and development standards are met
- Technologies: Vue.js, Nuxt.js, JavaScript, Vuex, Bootstrap, HTML, SCSS

Front-End Developer – VYANA.io

Toronto, Ontario

October 2019 – December 2020

- UI development on dispatcher screen displaying real-time driver data used by 5000+ drivers and 500+ dispatchers across North America daily
- Worked closely with back-end developers to create single purpose view models, removing unnecessary and redundant API calls
- Front-end integration between external CRM and internal fleet mapping application, improving efficiency for dispatchers by 33%
- Technologies: Angular 8+, TypeScript, NgRx, Angular Material, SCSS, HTML

Software Engineering Intern – J. Walter Thompson

Toronto, Ontario

January 2017 – June 2017

- Front-end development for Mazda Canada's test drive micro-site which had 3000 unique monthly visitors
- Developed media enriched HTML5 banners using GSAP for clients such as Mazda, Air Canada, and HSBC
- Updated, built, and performed web-maintenance on large client websites including Hotels.com, Mazda.ca and Children's Miracle Network
- Technologies: JavaScript, HTML, SCSS, GSAP
